

SITE NAME:	Calumet Container
SITE NUMBER:	0000001
ADDRESS:	3631 Stateline Road
CITY:	Hammond
COUNTY:	Lake
SCORE:	16.07
SCORE DATE:	December 1990
CONTAMINANT TYPE:	Solvents and Metals
MEDIA AFFECTED:	Soil
CONTACT PERSON:	Ryan Groves at (317) 233-2406
LAST REVISED:	December 2002
<a href="#">SITE PHOTO</a>	
<p>STATUS: Calumet Containers operated a former drum and pail recycling facility. A fire at the site led to emergency and time critical removal actions by the United States Environmental Protection Agency in 1982 and 1984 respectively. These removal efforts included disposal of contaminated drums, pails, tanker trailers, and soil. Results of soil and groundwater sampling in November 2001 showed elevated levels of heavy metals and volatile organic compounds. IDEM referred this site to the US EPA's Superfund Emergency Removals program. The US EPA conducted additional sampling of surface and subsurface soils during April and May of 2002. US EPA determined that additional soil remediation is necessary. The additonal remediation is scheduled for the spring of 2003.</p>
